#### ABOUT US:

SS Export House (India) is a benchmark in highly advanced Manufacturer & Exporter of Indian natural stones like Granite, Marble, Slate, Sandstone, Limestone, and Cobble. We are experts in finishes, such as hand cut & machine cut, sawn, honed, polished brushed, tumbled & calibrated-natural cleft both sides. We have successfully completed various esteemed projects in many countries by supplying quality stone products at very moderate and competitive prices. Most importantly, the values upon which our entire business depends are the main pillars of our business.

The company is a regular supplier of its materials to S. Korea, Japan, Taiwan, Malaysia, United Kingdom, Italy, Belgium, Germany, Spain, France, Israel, Greece, Canada, USA, Australia, and UAE. Our benchmarks are very stringent and we qualify our quality to match the DEAN standards of Germany.

Our success is based upon our ability to respond flexibly to our customers' individual needs for both big, as well as, small projects. Our experience and detailed knowledge of the stone industry, our competitive prices, punctuality and excellent services rendered by a team of highly professional and trained staff makes us stand tall and heads high in a market of intense competition and nonstop demand.

We are one of the top exporters, as a result of unmatched consistency in quality and on time supply. We not only produce but we also buy stones from various quarries from all over India. We prefer not to produce all varieties in one factory because the cost of transporting different stones back to our factories would become very high, and so to keep the prices as low as possible, we choose to buy stones from the factories near the quarries in different regions. Our trained field staff controls the production & quality and pack containers at the factories and sends them directly to the ports.

#### EXCELLENCE IN EXECUTION:

We believe in excellence of execution in small everyday tasks, as much as, big and complex projects. If something is worth doing, it is doing it well. Excellence in execution reflects in our disciplined approach and dedication towards work.

#### CONSUMER FOCUS:

We rethink every business process, product and service from the standpoint of our customer, so as to exceed expectations at every touch point. We believe in long term relations and work hand in hand with our valued customers to ensure that they get the best value for their money.

#### TEAMWORK:

Our company has a team of highly qualified and experienced super focused individuals, who check and assure quality in each and every stage of production. Our staff's attitude towards working together for producing better quality is an asset to our company and the esteemed customers.

#### RESPECT FOR COMPETITION:

We respect competition, because there is more than one way of doing things right.

#### SUPERIOR MATERIAL:

We understand that our reputation is only by the reputation of the material that goes in the form of our products. That is why, our products are widely used in esteemed organizations. If ever, a unique application requires a specially formulated material, our technical staff will be pleased to assist you in developing such a compound to your desired specifications.

#### ON TIME DELIVERY:

Chances are that you wouldn't find anyone who will get you what you need, and especially when you need it. On time delivery and swift dispatch of your awaited product, is what, is our strict benchmark and work satisfaction. What that matters to you are just in time deliveries.

#### VALUE ADDED PRICING:

Our product quality is second to none and you will find our pricing very attractive and competitive though. What's more, you don't have to order more than you need, as we maintain a low minimum order policy.

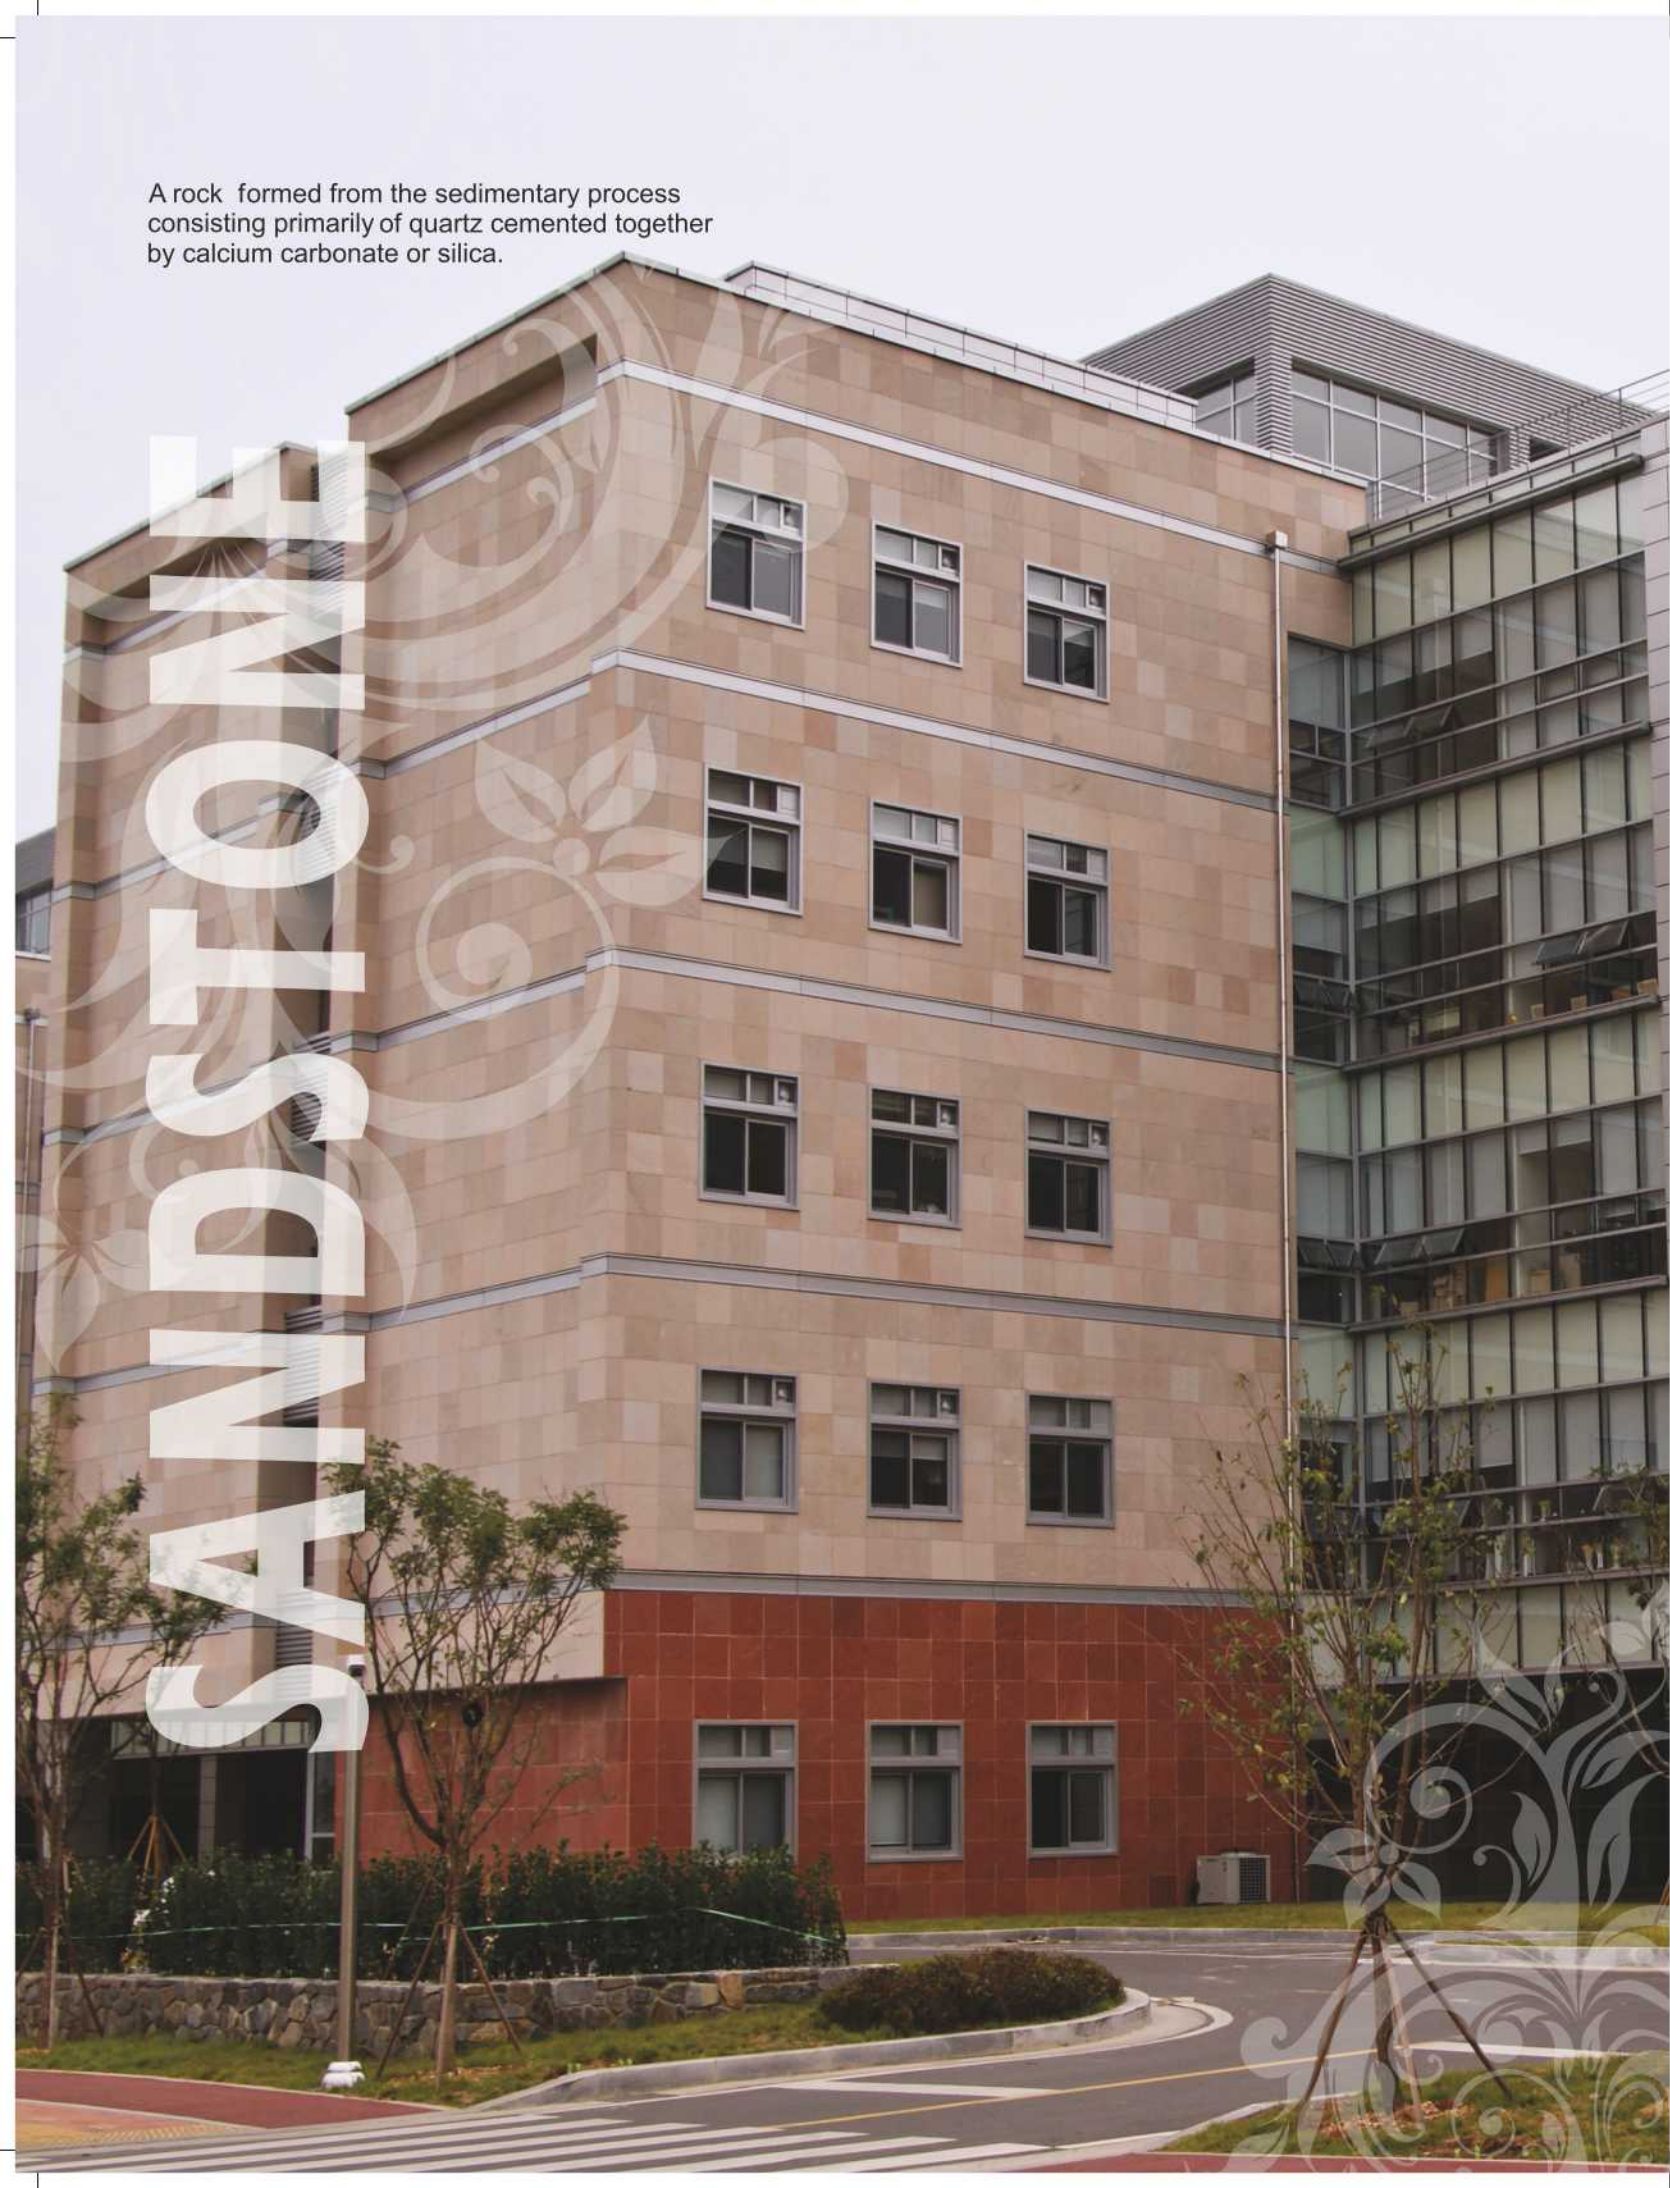

Coverings, USA

Stonetech, Germany

A rock formed from the sedimentary process consisting primarily of quartz cemented together by calcium carbonate or silica.

# GRANITE

Granite began its life as liquid magma within the Earth's core. A hard, crystalline, igneous rock formation formed from extreme heat, comprised of various minerals such as feldspar and quartz. Granites are ideal for counter tops. Resists scratches, heat, and acidic substances. Can be used for indoor and outdoor flooring, even in climates that experience freezing. Excellent for bathroom vanities.
